PROFESSIONAL SUMMARY

Full-Stack Developer with a CAS in Web Application Development (HES-SO) and an independent portfolio of production-grade software platforms built around Swiss business domains. I design and deploy end-to-end systems across frontend, backend, data, testing, and infrastructure, and I am seeking a first professional software role where I can contribute strong execution, architectural discipline, and a proven ability to build and maintain complex systems independently.

INDEPENDENT ENGINEERING WORK

Independent Full-Stack Developer | Personal Engineering Portfolio | 2021 – Present

- Designed, built, and maintain 6 grouped software platform families covering Swiss real-estate, retail, food delivery, healthcare, postal logistics, and ERP domains — 24 applications across 6 technology stacks, all in production.
- Operate swiftapp.ch as the portfolio hub: Traefik reverse proxy, wildcard HTTPS, Docker Compose orchestration, GitHub Actions CI/CD pipelines, and VPS administration on a self-managed server.
- Applied consistent engineering practices across all projects: modular architecture, RBAC, multilingual APIs (DE/FR/EN/IT), payment integrations, and automated testing from unit to E2E.

SELECTED PROJECT FAMILIES · SWIFTAPP.CH

Swiss Food Delivery Marketplace | [Node.js + Laravel](#) · [React + Vue 3 + Angular](#) · [Socket.io](#) · [BullMQ](#) · [Redis](#)

- Multi-actor platform (customers, restaurants, couriers, admins) with real-time order tracking, async job queues, and role-based back-office workflows — delivered through three parallel frontend implementations (React, Vue 3, Angular) on the same domain.
- Dual backends (Node.js + Laravel) and a VILT admin panel; complete order lifecycle state machine with Swiss-oriented payment workflow simulations (TWINT, PostFinance, Stripe).

Swiss ERP Platform | Dual Stack | [ASP.NET Core 10 \(C#\)](#) · [Spring Boot 3.5 \(Java\)](#) · [PostgreSQL](#) · [Keycloak](#) · [Blazor + Thymeleaf/HTMX](#)

- Enterprise ERP for Swiss watch manufacturing — accounting, HR, inventory, CRM, production, and sales modules — implemented independently in both .NET and Java with identical architecture and API parity.
- Swiss business rules from the start: QR-bill invoicing (ISO 20022), Swiss VAT structure, nDSG-aligned audit logging, and Keycloak OIDC identity management.

Swiss Postal Logistics Platform | Dual Stack | [ASP.NET Core 10](#) · [Spring Boot 3.5](#) · [Keycloak 26](#) · [Redis](#) · [PostgreSQL](#) · [Flyway](#)

- Parcel lifecycle management with delivery routing, branch operations, PTT address database integration, and notification workflows — same domain built in .NET and Java with consistent module boundaries and event-driven communication.

Swiss Real-Estate Platform | [Node.js + Laravel](#) · [React + Vue 3 + Angular](#) · [PostgreSQL + MongoDB](#) · [Meilisearch](#) · [Cloudinary](#)

- Multi-actor property discovery platform with multilingual listings, geospatial canton filtering, agency back-office tools, and full-text property search — dual backends and triple frontends on the same domain, demonstrating cross-stack consistency.

Swiss E-Commerce Platform | [Node.js + Laravel](#) · [React + Vue 3](#) · [MySQL + MongoDB](#) · [Meilisearch](#) · [Stripe](#)

- Multi-store retail ecosystem with product catalogues, inventory management, coupon engine, multilingual storefronts, and Swiss-oriented checkout — modular backends, RBAC admin dashboards, and Stripe payment integration.

Swiss Healthcare Network Platform | [Node.js](#) · [React](#) · [MongoDB + Redis](#) · [MUI v6](#) · [Redux Toolkit](#)

- Multi-site healthcare platform with appointment booking, doctor directories, multilingual service listings, event calendar, job postings, and emergency contacts — privacy-aware access patterns and lean content management workflow.

TECHNICAL SKILLS

Backend	Node.js / Express · Laravel (PHP) · ASP.NET Core (C#) · Spring Boot (Java)
Frontend	React · Vue 3 · Angular · Next.js · Blazor SSR · Thymeleaf · TypeScript · Tailwind · MUI · Bootstrap
DBMS	PostgreSQL · MySQL · MongoDB · Redis · Meilisearch
Architecture	Modular Monolith · Clean Architecture · DDD · Repository + Service Layers · Event-Driven
Auth & Security	JWT · OAuth2/OIDC · Keycloak · RBAC
Testing & Quality	Jest · Pest · Vitest · Playwright (E2E) · Testcontainers
DevOps	Docker · CI/CD GitHub Actions · Traefik · Nginx · Linux VPS admin
Payments	Stripe · PostFinance / TWINT (simulated workflows)
Swiss Standards	Swiss VAT rates · QR-bill ISO 20022 · Multi-lingual applications (DE/FR/EN/IT)

EDUCATION

2020	Certificate of Advanced Studies (CAS) — Web Application Development Haute École Spécialisée de Suisse Occidentale (HES-SO) <i>Full-stack architecture · REST API design · modern JS frameworks · databases · DevOps</i>
2007	Bachelor of Science — Civil Engineering University of Mekele

LANGUAGES

English	Fluent — professional working proficiency
French	Intermediate (B1)
Amharic	Native
